MEDNET SOLUTIONS TO SPEAK, SPONSOR AND EXHIBIT AT THE 2008 SOCIETY OF CLINICAL DATA MANAGEMENT ANNUAL CONFERENCE IN DALLAS

Minnetonka, MN – MedNet Solutions, a global eClinical technology company specializing in clinical study management systems, today announced the company's active involvement as a speaker, sponsor and exhibitor at the 2008 Society of Clinical Data Management (SCDM) Annual Conference, to be held Sunday, September 21 through Wednesday, September 24 in Dallas, Texas.

The SCDM has invited Dr. Timothy Pratt, PhD, Chief Marketing Officer and Principal Scientific Advisor for MedNet Solutions, to share his extensive industry knowledge and expertise with conference attendees at 10:30 a.m. on Tuesday, September 23. In his presentation entitled "Haste Makes Waste," Dr. Pratt will discuss four often-overlooked corporate characteristics that are vital to assess when selecting an EDC/eClinical technology partner, as well as seven points to keep in mind when facing the unexpected loss of a trusted vendor.

As an exhibitor and second-year Silver Select Sponsor of the SCDM Annual Conference, all attendees will have the opportunity to meet with Dr. Pratt as well as other MedNet team members in MedNet's booth (#307), and see firsthand MedNet's comprehensive, yet highly configurable web-based eClinical technology. The MedNet eClinical Solution is designed to automate and simplify the day-to-day activities of all individuals involved with clinical studies, resulting in significant time and cost savings for sponsors, CROs and clinical sites.

SCDM is a non-profit professional society founded to advance the discipline of Clinical Data Management. The binding interest of all members is quality clinical data management practices.

MedNet Solutions is a leading eClinical technology solutions company supporting the pharmaceutical, medical device and biotechnology industries. Applying Critical Insight, Proven Technology, and Unwavering Support, MedNet helps sponsors and CROs alike deploy efficient and successful clinical studies and registries of all phases and types. Since 2000, MedNet has successfully supported over 50 major customer organizations on projects spanning 6 continents and more than 40 countries, with a highly configurable and easy to learn web-

based eClinical solution. MedNet delivers a superior customer experience from beginning to end. For more information, please visit www.mednetstudy.com.
