MEDNET SOLUTIONS TO PREVIEW IIMEDNET, THE COMPANY'S NEXT GENERATION EDC SOLUTION, AT THE 46th DIA ANNUAL MEETING

Minnetonka, MN – MedNet Solutions, a global life sciences technology solutions company specializing in clinical study management systems, is pleased to announce that it will be previewing *iMedNet™*, the company's innovative, next-generation EDC/eClinical technology platform, at the 46th DIA Annual Meeting in Washington DC.

Demonstrations will take place at MedNet Solution's booth (#1427) in the exhibits area at the Walter E. Washington Convention Center on Monday, June 14 through Wednesday, June 16.

iMedNet delivers a practical, affordable, and easy-to-use web-based technology platform that allows non-technical research personnel to rapidly build and effectively manage their own clinical studies. *iMedNet* is a brand new system – built from the ground up using the latest technology tools – based on MedNet's extensive, decade long experience developing proven EDC/study management systems. And since *iMedNet* uses a low-cost, software-as-a-service (SaaS) pricing model, it provides an ideal solution for studies of any kind...including early stage/Phase I trials and investigator initiated research.

"*iMedNet* is perfect for sponsors and CROs who wish to configure, deploy and maintain their own EDC systems," stated Kevin S. Anderson, Vice President of Marketing at MedNet Solutions. "The system's intuitive Designer Tools make this process incredibly fast and efficient...and you don't need to be a programmer to do it."

Attendees at the DIA Annual Meeting are encouraged to visit MedNet's booth to see firsthand how *iMedNet* can decrease study timelines, improve productivity and lower overall costs. General availability of the *iMedNet* solution is scheduled for the 3rd quarter of 2010.

About MedNet Solutions

MedNet Solutions is a leading healthcare technology company specializing in clinical study management systems designed for the global life sciences market. Applying critical insight, proven technology and unwavering support, MedNet delivers powerful, flexible and easy-to-use web-based solutions that support our customers' clinical studies, registries and investigator initiated trials.
